Drinking Water Analysis Report

NELAP #E861173 / EPA Lab Code #FL01308

Prepared for: 2233 West Main Street
Sample City, Wisconsin 53111

Phone: (262) 225-9668

Email: hello@wisconsininspection.com

Test Address: CLIENT ADDRESS

Lab COC #: 52579670

Date Collected: 09/01/20XX
Analysis Date: 09/01/20XX

Receive Date: 09/01/20XX
Report Date: 09/02/20XX

CONCLUSION: Your drinking water **PASSED** some of the Environmental Protection Agency's (EPA) established Primary (health-related) Drinking Water Standards for human consumption. These primary standards must be met for water potability required by FHA/HUD/VA/USDA. Secondary standards are not considered by the EPA to be a risk to human health.

Sample Location: KITCHEN

Primary Contaminant	Results	Acceptable Range	Determination
Coliform Bacteria	ABSENT	Zero	PASS
E. coli Bacteria	ABSENT	Zero	PASS
Lead	None Detected	0.0 to 9.9 ppb	PASS
Nitrate as Nitrogen	2.9 ppm	0.0 to 10.0 ppm	PASS
Nitrite as Nitrogen	None Detected	0.0 to 1.0 ppm	PASS

Approved by: John D. Shane Ph.D., Laboratory Manager

The Environmental Protection Agency (EPA) is responsible for the National Primary Drinking Water Regulations ([national primary regulations](#)). These regulations are health-related standards that establish the Maximum Contaminant Levels in drinking water. However, the EPA does not regulate private drinking water wells or private water supplies. These water sources are not subject to EPA standards. Some state or local governments do set rules to protect users of these types of water supplies. It is the responsibility of the homeowner to maintain the safety of their water. Information to help homeowners care for their private wells and protect their health can be found at [epa.gov/privatewells](#). PriorityLab is accredited under the NELAC Institute (TNI) for E. coli and Coliform Bacteria, Lead, Nitrates and Nitrites and Fluoride in water.
